

Light is simple

Create a modern, collaborative workplace

The modern office uses an open plan to embrace an increasingly mobile and interactive workforce. Workstations can be communal and many space layouts are designed to help drive business conversation and collaboration. Lighting can play an integral role by supporting individual task requirements and worker preferences.

An engaging work space can attract and retain talent – a constant challenge for business leaders particularly when the skill-set needed is in high demand. In turn, this type of space can help building owners fill their space in a highly competitive real estate market.

Introducing the ENCELIUM EDGE™ System

The ENCELIUM EDGE Standalone Wireless Light Management System is a simple, state-of-the-art solution that supports up to approximately 10,000 square feet and/or up to 100 nodes. It enables the correct levels of light, for different task requirements and individual preferences, while also maximizing energy savings.

Installation and setup is simple and quick. Lighting control can be initialized using code-compliant, default settings. Time scheduling, daylight harvesting and other lighting control strategies can be modified easily using the intuitive ENCELIUM EDGE Mobile Setup App.

Addressing Business Requirements

- Attract high performing employees from a high demand talent pool
- Optimize the use of space
- Support collaboration and productivity
- Support corporate brand
- Lower operational costs
- Meet Energy code requirements (ASHRAE 90.1 & Title 24)

ENCELIUM EDGE System Application

ENCELIUM EDGE System Architecture

Each ENCELIUM EDGE System supports up to approximately 10,000 square feet and/or up to 100 nodes. Leveraging a mesh network based on ZigBee® standards, the ENCELIUM EDGE Controller delivers dedicated commands to additional OSRAM hardware modules compatible with the ENCELIUM EDGE System.

ENCELIUM EDGE Mobile Setup App

The ENCELIUM EDGE Mobile Setup App enables your local OSRAM representative to scan installed hardware modules, group and connect them to the appropriate ENCELIUM EDGE Controller, and adjust default scenes if required.

The ENCELIUM EDGE Mobile Setup App is intuitive. It can be downloaded for free through the AppStore or Google Play for simple scene programming changes such as daylight harvesting, time scheduling and individual fixture brightness levels. Training on the ENCELIUM EDGE Mobile App is available from your local OSRAM representative with on-line tools available at www.osram.us/partner-resources.
